Thanks for supporting your local organic farmers! We are very particular about our wholesale orders which are harvested day of delivery – especially perishable greens with a few exceptions. We want to provide people with vibrant healthy vegetables. Our bunches are far more generous than common wholesale standard and loss for the produce room should be minimal. Produce is carefully picked and packed by hand, pre-washed or hydro-cooled. Our prices are intended to be fair and consistent for the retailer, customer and the farm and have little room for adjustment in order to meet costs. We look forward to working with you.
